Projected Retirement Income: \$54,000.00

Financial Projections

Chart visualizations would be embedded here showing: - Asset growth projections - Income timeline analysis - Tax impact analysis - Monte Carlo simulation results

Recommendations

1. Continue regular contributions to retirement accounts
2. Consider Roth conversion strategies for tax optimization
3. Review and adjust asset allocation based on risk tolerance
4. Monitor IRMAA thresholds for Medicare premium management
5. Schedule annual review to adjust strategy as needed
