Life illustration summary

Accumulator Ascent IUL

My planned premium is:
\$86,000 annually

*Protection for today, tomorrow
and the unexpected*

Death benefit

I want to help provide for the people and causes I care about.

When I pass away, my beneficiaries will receive a tax-free¹ death benefit of:

\$917,010²

Available funds

I want access to extra money to supplement retirement and other future needs.

The projected cash value³ I can access from my policy is:

Age 66 | \$604,595

Age 71 | \$846,043

Age 76 | \$811,729

Age 81 | \$675,207

Living benefits

If I get sick, I want access to cash or other benefits and services.

If certified by a licensed health provider for a qualifying event or illness,⁴ my projected cash benefits are:

Chronic Illness: \$458,505 lump sum

Terminal Illness: \$500,000 lump sum

Chronic Care Advantage: Not Elected⁵

Cancer Care CompassSM: Not Elected⁶

Benefits and values shown above are not guaranteed. Actual results may be more or less favorable.

This is a summary of the basic illustration, not a contract. This illustration summary applies to policy form ICC17_LC1, available in most states, and is not valid unless presented with all pages of the basic illustration.

Please refer to the basic illustration for guaranteed elements and other important information.

¹ In most instances, life insurance proceeds are not subject to federal income taxes.

² Initial death benefit is displayed. The death benefit is subject to change based on features and other conditions of the policy.

³ Projected cash value is based on non-guaranteed elements and is subject to change.

⁴ Refer to the Benefits Information, Optional Illustrated Benefits and Benefits Included at No Additional Premium sections within this illustration for details on each rider.

⁵ Recertification is required every 12 months.

⁶ This is the maximum benefit available and may be lower based on qualifications.

Why Symetra

indexed universal life insurance?

Death benefit proceeds

Your death benefit can help ensure your family or business is protected when you're gone. It can be used to help with burial expenses, to pay a mortgage, fund a buy-sell agreement, or for daily living expenses.

Death benefits are usually received tax free by your beneficiaries.

Cash value growth potential

Our diverse, index-linked crediting strategies offer the potential to accumulate more cash value to supplement retirement and other future income needs. Each index strategy provides a minimum index crediting rate or "floor," so you'll never lose value based on market performance.

Policy flexibility

You can customize your coverage amount, policy duration and premium payments to fit your needs. You also have access to optional riders that can add further benefits to your policy.

This is a summary of the basic illustration, not a contract. This illustration summary applies to policy form ICC17_LC1, available in most states, and is not valid unless presented with all pages of the basic illustration.

Symetra Accumulator Ascent IUL Indexed Universal Life Insurance

A flexible life insurance solution that offers both death benefit protection and future income potential.

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Life Insurance that offers death benefit protection and future income potential

At its core, Symetra Accumulator Ascent IUL 3.0 is designed to provide income-tax-free death benefit coverage. However, it is also designed to enhance policy value growth through our index crediting strategies, potentially providing tax-advantaged supplemental income.

Although proceeds of life insurance are generally received income-tax-free by beneficiaries, estate and local taxes may apply. Consult your attorney or tax professional for more information.

✓ **Policy Value Growth Potential:** Ten index crediting strategies are available so you can participate in the growth of a rising market but are protected from the loss of a negative market.

✓ **Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy:** Provides a lower participation rate than the Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 1.00% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy does not guarantee a greater Policy Value credit than other index strategies.

✓ **Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy:** Provides a higher participation rate than Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy. The Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not provide an additional index credit amount (bonus). Index credits are determined and credited at segment maturity. Election of a Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not guarantee a greater Policy Value credit than other index strategies.

✓ **Symetra Allocation Index Strategies:** Are index crediting strategies which allocate the funds automatically to either the S&P 500® index strategy, or the JPMorgan ETF Efficiente® index strategy. Which strategy receives the allocation is based on an external market volatility index known as the Cboe's VIX index or the "VIX". If the VIX is below the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully into the S&P 500® index strategy. If the VIX is equal or above the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully to the JPMorgan ETF Efficiente® index strategy. Once your money has been allocated to either the S&P 500® index strategy or JPMorgan ETF Efficiente® 5 index strategy, it will remain in that index strategy until the segment matures and a new segment is created.

- Symetra Allocation Index 1-Year Point to Point
- Symetra Allocation Index 2-Year Point to Point

Election of the Symetra Allocation Index Strategies does NOT guarantee a greater Index credit for any index segment term.

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

✓ **Core Index Strategies with Bonus:** Provides a lower index cap rate than the Core Index Strategies but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to these Core Index Strategies with Bonus will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 0.75% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of these Core Index Strategies with Bonus does not guarantee a greater Policy Value credit than other index strategies. Our Core Index Strategies with Bonus include:

- S&P 500® Index with Bonus - 1-Year Point to Point
- Nasdaq-100 Index® with Bonus - 1-Year Point to Point

✓ **Core Index Strategies:** Lock-in any interest earnings and help protect against losses in negative markets. Our Core options include:

- S&P 500® Composite Stock Price Index - 1-Year Point to Point
- Nasdaq-100 Index® - 1-Year Point to Point
- JPMorgan ETF Efficiente® 5 Index - 1-Year Point to Point
- Blended S&P 500® Index and JPMorgan Efficiente® 5 Index - 2-Year Point to Point

✓ **Why Index Cap and Participation Rates Can Fluctuate:** Index caps and participation rates are primarily affected by Symetra's fixed income investment portfolio yields and hedging costs for participating in the index strategies. Symetra uses a hedging strategy that purchases option contracts on the selected index. The hedging strategies help support the index strategy's interest crediting rate. Hedging costs change with market conditions and can affect the index caps and participation rates declared by Symetra.

Periods of high fixed income portfolio yields and low hedging costs can produce higher declared index caps and participation rates. Periods of low fixed income portfolio yields and high hedging costs can produce lower declared index caps and participation rates.

✓ **Access:** Through withdrawals and loans, provides access to policy values for future supplemental income needs.

In addition, if facing a terminal illness or chronic illness, your death benefit may be able to provide cash you can use to cover your expenses.

✓ **Guarantees:** Your policy contains a Lookback Guarantee which may provide an increase in policy value, if the average annual percentage rate of any actual index credits, over the respective Lookback Guarantee Period, is less than the average annual percentage rate of any index credits based on the Lookback Guarantee rate, as defined in the policy, per year cumulatively over resetting 8-year periods. The first 8-year period begins at the time your policy is issued and will be recalculated, over an 8-year period, after the previous period has elapsed.

✓ **Charitable Giving Benefit Rider:** For no extra premium, your policy can provide a qualified charity of your choice with an additional benefit of 1% of the base policy specified amount (up to \$100,000) upon the insured's death. This rider is only available at application.

Within this custom-tailored illustration, you'll find information on your premiums and death benefit, as well as detailed projections on how your policy value could potentially grow over time. We've created this illustration to help you and your insurance professional explore what Symetra Accumulator Ascent IUL 3.0 can do for you and the people you care about.

Initial Annual Premium: \$86,000.00

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

You can choose the amount and frequency of your premiums, as long as you have enough Net Surrender Value to cover policy charges. Depending on how your policy performs, you may need to maintain, resume or increase your premium payments in order to continue your death benefit.

Benefits Information

The following benefits are included in this illustration:

- ✓ Accelerated Death Benefit for Terminal Illness Rider (no additional premium) - Form Number ICC16_LE5
- ✓ Accelerated Death Benefit for Chronic Illness Rider (no additional premium) - Form Number ICC16_LE6
- ✓ Overloan Lapse Protection Rider (no additional cost unless exercised) - Form Number ICC17_LE5
- ✓ Charitable Giving Benefit Rider (no additional premium) - Form Number ICC16_LE8
- ✓ No-Lapse Guarantee (no additional cost)

Benefits Included at No Additional Premium

Accelerated Death Benefit for Terminal Illness Rider allows you to access up to \$500,000 of the policy's death benefit while living if a physician determines the insured is terminally ill with less than 12 months to live. The Accelerated Benefit Death payment is discounted by one year of interest guaranteed not to exceed the policy Loan Interest Charged on Borrowed Amounts. Any changes to the death benefit will result in a change to the amount available. ICC16_LE5

Accelerated Death Benefit for Chronic Illness Rider allows you to access up to \$458,505 of the policy's death benefit if the insured is diagnosed with a chronic illness. A licensed health care practitioner must certify the insured is unable to perform, without substantial assistance, at least two of six activities of daily living (bathing, continence, dressing, eating, toileting, and transferring) due to the loss of functional capacity; or has a severe cognitive impairment, requiring substantial supervision to ensure the health and safety of him or herself. You can refer to the Accelerated Benefit Application Disclosure form for complete details. This amount is based on the initial death benefit. Any changes to the death benefit will result in a change to the amount available. ICC16_LE6

The Insured must be re-certified as being Chronically Ill every 12 months, prior to the expiry of the last certification.

Important note:

There is no restriction on the use of proceeds of these accelerated death benefits when the insured has become chronically ill or otherwise eligible for benefits from a qualified event.

Overloan Lapse Protection Rider protects your policy from inadvertently lapsing and potentially losing its favorable life insurance tax treatment when an outstanding loan balance nears the policy value. ICC17_LE5

Symetra Life Insurance Company will notify you in writing of your option to exercise the rider when qualifications are met. When exercised, no further premium payments or loan repayments are due and your policy will not lapse. Additional loans and withdrawals are no longer available.

Qualifying conditions:

- When the policy value multiplied by the applicable IRS Guideline factor exceeds your death benefit as detailed in your policy.
- The insured is at least 75 years of age.
- The policy is in-force for at least 15 years.
- Loan amount must exceed the smaller of either: [a] 93% multiplied by the policy value, or [b] (100% - applicable Overloan Protection Exercise Charges) multiplied by the policy value.

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Exercising the rider option:

- Rider must be exercised in writing.
- Death benefit option is level specified amount. If currently not level, it will be changed to level.
- Policy loan type is standard. If currently not standard, it will be converted to standard.
- One-time charge is deducted from the policy value when exercised.
- Unloaned policy value will be moved to the fixed account.
- Once exercised, the rider cannot be reversed.

Neither the IRS nor the courts have ruled on the tax consequences of exercising the Overloan Lapse Protection Rider. It is possible that the IRS or a court could assert that the Policy has been effectively terminated and that the outstanding loan balance should be treated as a distribution, all or a portion of which could be taxable when the Rider is exercised. In addition, this Overloan Protection Rider may not be appropriate for your particular circumstances. Consult with a tax professional regarding the risks associated with exercising this rider.

Charitable Giving Benefit Rider pays an additional benefit of \$9,170 to a qualified charity of your choice upon the death of the insured. This amount is based on the initial death benefit. Any changes to the death benefit will result in a change to the amount available. ICC16_LE8

No-Lapse Guarantee guarantees that the policy will remain in-force for 18 years as long as a premium of \$30,386.04 is paid annually.

A rider is a provision of the policy that may have additional costs, limitations, potential benefits and features that should never be confused with the base policy itself. Before evaluating the benefits of a rider, carefully examine the policy to which it is attached.

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Index Strategies

Symetra Accumulator Ascent IUL 3.0 is designed to maximize your policy's growth and income potential through our Index Strategies. Each index strategy provides a guaranteed minimum crediting rate so you'll never have negative returns in a down market. Plus, any index-linked gains your policy value receives are locked-in and shielded from market declines in the future. You may elect to choose from two Putnam Dynamic Low Volatility Excess Return Index strategies, two Symetra Allocation Index strategies, two Core Index Strategies with Bonus and four Core Index strategies.

Putnam Dynamic Low Volatility Excess Return with Bonus Strategy: Provides a lower participation rate than the Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 1.00% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of this Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy does not guarantee a greater Policy Value credit than other index strategies.

Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy: Provides a higher participation rate than Putnam Dynamic Low Volatility Excess Return Index with Bonus Strategy. The Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not provide an additional index credit amount (bonus). Index credits are determined and credited at segment maturity. Election of a Putnam Dynamic Low Volatility Excess Return Index with High Participation Rate Strategy does not guarantee a greater Policy Value credit than other index strategies.

Symetra Allocation Index Strategies: Are index crediting strategies which allocate the funds automatically to either the S&P 500® index strategy, or the JPMorgan ETF Efficient® index strategy. Which strategy receives the allocation is based on an external market volatility index known as the Cboe's VIX index or the "VIX". If the VIX is below the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully into the S&P 500® index strategy. If the VIX is equal or above the VIX Threshold of 16, two business days prior to the Allocation Date, then the Allocation goes fully to the JPMorgan ETF Efficient® index strategy. Once your money has been allocated to either the S&P 500® index strategy or JPMorgan ETF Efficient® 5 index strategy, it will remain in that index strategy until the segment matures and a new segment is created.

- ✓ Symetra Allocation Index 1-Year Point to Point
- ✓ Symetra Allocation Index 2-Year Point to Point

Core Index Strategies with Bonus: Provides a lower index cap rate than the Core Index Strategies but applies an additional index credit rate to the Policy Value upon maturity of the index segment. This additional index credit rate is used to determine the additional index credit amount (bonus) and is in addition to any other index credits earned. Only allocations to these Core Index Strategies with Bonus will be eligible to receive this additional index credit amount. The additional index credit rate which determines the bonus is currently 0.75% but will never be less than the Guaranteed Minimum Additional Index Credit Rate shown in the policy. Election of these Core Index Strategies with Bonus does not guarantee a greater Policy Value credit than other index strategies. Our Core Index Strategies with Bonus include:

- ✓ S&P 500® Index with Bonus - 1-Year Point to Point
- ✓ Nasdaq-100 Index® with Bonus - 1-Year Point to Point

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Our Core strategies: Offer you the option to select from four index strategies, including:

- ✓ S&P 500® Composite Stock Price Index - 1-Year Point to Point
- ✓ Nasdaq-100 Index® - 1-Year Point to Point
- ✓ JPMorgan ETF Efficiente® 5 Index - 1-Year Point to Point
- ✓ Blended S&P 500® Index and JPMorgan ETF Efficiente® 5 Index - 2-Year Point to Point

Because Symetra Accumulator Ascent IUL 3.0 is not an investment contract, net premium is not directly invested in the market or any index strategy.

Creating Index Segments

When you pay a premium, a premium charge is subtracted from your premium, resulting in what is called net premium. The net premium stays in the Holding Account, along with interest earned, if any, during the period as well as any standard loan repayments made. On the next monthly allocation date, the amount in the Holding Account is allocated to the fixed account and/or index strategies, based on your chosen allocation. Any amount you have allocated to an index strategy creates an index segment. Once an index segment has been created, you may not transfer out until the end of the segment term. At the end of the segment term, a new segment will be created based on your current allocation.

Calculating Index Credits

An index strategy credits interest by measuring the percentage difference between values of the measuring index(es) (S&P 500®, for example) at the start and end of the segment term, then applying any applicable index cap, spread, floor and participation rate.

Each index segment has its own index crediting method, index value, index cap, index floor, index participation rate, index segment term, and index start and maturity date. The index caps, floors and participation rates after the initial index segment term may be higher or lower than the initial rates, but will never be less than the guaranteed minimums shown in the policy. The index spreads after the initial index segment term may be higher or lower than the initial spreads, but will never be higher than the guaranteed maximum shown in the policy. The segment cap, spread, floor and participation rates shown in this illustration are as of 7/29/2025.

Index Cap: The maximum interest rate a segment will be credited. If the measuring index's performance is greater than the cap, the segment interest rate will equal the cap.

Index Floor: The minimum interest rate a segment will be credited. If the measuring index's performance is less than the floor, the segment interest rate will equal the floor.

Index Participation Rate: This rate describes how much of the change to the index(es) that you "participate" in.

Index Spread Rate: The index spread rate, if applicable, is a rate used to determine the final Index Credit. The index spread rate must be exceeded by the index in order to earn any Index Credits.

| Putnam Dynamic Low Volatility Excess Return Index | Segment Term | Index Cap | | Index Floor | | Index Participation Rate | |
|--|-----------------|-----------|------------|-------------|------------|--------------------------|------------|
| | | Current | Guaranteed | Current | Guaranteed | Current | Guaranteed |
| With Bonus | 1-Year | No Cap | No Cap | 0.00% | 0.00% | 188.75% | 50.00% |
| With High Participation Rate | 1-Year | No Cap | No Cap | 0.00% | 0.00% | 220.00% | 65.00% |

Hypothetical Returns by Strategy

The historical rates shown below are determined by applying the current index cap, index floor and participation rate to the most recent 25 full calendar years of historical index performance. If no index value was published on the beginning and end dates of the calendar year, then the most recent previous index value was used to determine the historical rates.

IMPORTANT NOTE: The Putnam Dynamic Low Volatility Excess Return Index launched April 2020. Values in this illustration are based on hypothetical back-tested performance prior to this date. Back-testing uses simulated analysis and hypothetical circumstances to estimate how the index may have performed prior to its actual existence. Index performance calculated by back-testing is purely theoretical. The hypothetical back-tested performance in this illustration has not been verified by an independent third party. Neither Symetra nor Putnam makes any representation that the index will perform as represented in this illustration.

IMPORTANT NOTE: The JPMorgan ETF Efficiente® 5 Index launched on October 29, 2010. Values in this illustration are based on a combination of actual index performance after this date and hypothetical back-tested performance prior to this date. Back-testing uses simulated analysis and hypothetical circumstances to estimate how the index may have performed prior to its actual existence. Index performance calculated by back-testing is purely theoretical. The hypothetical back-tested performance in this illustration has not been verified by an independent third party. Neither Symetra nor JPMorgan makes any representation that the index will perform as represented in this illustration.

The actual credited rates will vary based on the actual change in the index and actual declared cap and participation rate within each index segment. These figures do not represent actual interest that would have been credited because the index cap and participation rate would have changed over time and actual results would have been different. There are administrative, cost of insurance and product charges associated with the Symetra Accumulator Ascent IUL 3.0 policy. The historical returns by strategy do not reflect these charges. It is not meant to predict future performance.

The Maximum Illustrated Rate for each strategy is calculated by a method consistent with applicable regulations. The Averages are based on the past 20 and 25 years of performance starting on 1/1/2000, using the current index cap, index floor and index participation rate. A number of different reasonable methods may be used to calculate the averages. The maximum illustrated rates and averages are not an indication of future performance and are not guaranteed.

| Putnam Dynamic Low Volatility Excess Return Index | Maximum Illustrated Rate | 10-Year Average | 20-Year Average | 25-Year Average |
|--|---------------------------------|------------------------|------------------------|------------------------|
| With Bonus | 6.16% | 6.97% | 9.05% | 9.56% |
| With High Participation Rate | 7.16% | 8.12% | 10.55% | 11.14% |

It is Symetra's goal to be able to allow you to better understand and compare index account performance against other indexed universal life products that you may be considering purchasing. Along the same lines, Symetra's Accumulator Ascent IUL 3.0 product must be compliant with all applicable industry illustration guideline(s). To that note, we follow a regulatory illustration concept known as the *Benchmark Index Account*, which is derived under the following industry consistent approach:

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

- Looking back at the historical period of S&P 500 index returns (excluding dividends) over the previous 66 years, starting with the current calendar year
- Incorporating the product's current participation rate, index cap and index floor for the product's account (or equivalent account)
- Calculating the arithmetic average of all 25-year previous periods of time, inclusive of every trading day throughout this time period (which covers over 10,000 specific points in time)

From this, the maximum crediting rate that is allowed to be shown on your illustration is determined as shown above, along with the minimum and maximum rates derived under this calculation, which is required to also be provided for reference purposes:

The Product(s) is not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (Nasdaq, with its affiliates, are referred to as the "Corporations"). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Product(s). The Corporations make no representation or warranty, express or implied to the owners of the Product(s) or any member of the public regarding the advisability of investing in securities generally or in the Product(s) particularly, or the ability of the Nasdaq-100 Index® to track general stock market performance. The Corporations' only relationship to Symetra Life Insurance Company ("Licensee") is in the licensing of the Nasdaq®, Nasdaq-100®, Nasdaq-100 Index®, and certain trade names of the Corporations and the use of the Nasdaq-100 Index® which is determined, composed and calculated by Nasdaq without regard to Licensee or the Product(s). Nasdaq has no obligation to take the needs of the Licensee or the owners of the Product(s) into consideration in determining, composing or calculating the Nasdaq-100 Index®. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Product(s) to be issued or in the determination or calculation of the equation by which the Product(s) is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Product(s). The Corporations do not guarantee the accuracy and/or uninterrupted calculation of Nasdaq-100 Index® or any data included therein. The Corporations make no warranty, express or implied, as to results to be obtained by Licensee, owners of the product(s), or any other person or entity from the use of the Nasdaq-100 Index® or any data included therein. The Corporations make no express or implied warranties, and expressly disclaim all warranties of merchantability or fitness for a particular purpose or use with respect to the Nasdaq-100 Index® or any data included therein. Without limiting any of the foregoing, in no event shall the Corporations have any liability for any lost profits or special, incidental, punitive, indirect, or consequential damages, even if notified of the possibility of such damages.

The JPMorgan ETF Efficient® 5 Index ("JPMorgan Index") has been licensed to Symetra Life Insurance Company (the "Licensee") for the Licensee's benefit. Neither the Licensee nor Symetra Accumulator Ascent IUL (individually, the "Product") is sponsored, operated, endorsed, recommended, sold or promoted by J.P. Morgan Securities LLC ("JPMS") or any of its affiliates (together and individually, "JPMorgan"). JPMorgan makes no representation and gives no warranty, express or implied, to contract owners in or those otherwise taking exposure to the Product. Such persons should seek appropriate professional advice before making any investment. The JPMorgan Index has been designed and is compiled, calculated, maintained and sponsored by JPMS without regard to the Licensee, the Product or any contract owner. JPMorgan is under no obligation to continue compiling, calculating, maintaining or sponsoring the JPMorgan Index. JPMorgan may independently issue or sponsor other indices or products that are similar to and may compete with the JPMorgan Index and the Product. JPMorgan may also transact in assets referenced in the JPMorgan Index (or in financial instruments such as derivatives that reference those assets). These activities could have a positive or negative effect on the value of the JPMorgan Index and the Product.

Except for the JPMorgan ETF Efficient® 5 Index, and the Putnam Dynamic Low Volatility Excess Return Index, the performance of an index does not include the payment or reinvestment of dividends in the calculation of its performance.

The policy does not directly participate in any outside investment or index.

Policy Details

About this illustration

Symetra Accumulator Ascent IUL 3.0 is a Flexible Premium Adjustable Life Insurance Policy with Index-Linked Interest Option issued by Symetra Life Insurance Company (SLIC), 777 108th Avenue NE, Suite 1200, Bellevue, WA 98004.

This illustration explains the elements of the policy you are applying for. Many features of this illustration, including but not limited to, amount and frequency of premiums, death benefit amounts and interest rate, have a material impact on the policy. You should request different scenarios to see how each feature can impact the values shown.

This is an illustration only. An illustration is not intended to predict actual performance. Interest rates or values that are set forth in the illustration are not guaranteed, except for those items clearly labeled as guaranteed.

This illustration assumes that the currently illustrated non-guaranteed elements used will not change for all years shown. This is not likely to occur, and actual results may be more or less favorable than those shown. Assumptions on which non-guaranteed elements are based are subject to change.

Underwriting

Your actual risk class will depend on the outcome of underwriting. Illustrated values will be impacted if your actual risk class is different.

Net Death Benefit

Initial: \$917,010

Death Benefit Option A:
Level

This is the amount your beneficiaries will receive upon the death of the insured. The death benefit option you select will have an impact on the amount received. The net death benefit is reduced by any loans and loan interest.

Premium

Initial: \$86,000

Frequency: Annual

This is the amount you plan to pay each year. The illustration shows premium payments paid on the first day of each payment period. We reserve the right to require additional underwriting if the premium will result in an immediate increase in the difference between the death benefit and the policy value.

The amount required to place the policy in-force is \$7,596.51. You will not be billed for remainder of the initial premium. Payment of less than the illustrated initial premium you selected, even if the remainder of the initial premium is subsequently submitted, could result in earlier lapse and generally lower cash values than those illustrated.

Premium Allocation

When you pay a premium, a premium charge is subtracted from your premium. You may allocate your net premium payment to the fixed account and/or any of the index strategies that we make available to you.

You have elected that your premiums be allocated as follows:

| Blended S&P 500® Index and JPMorgan ETF Efficient® 5 Index | 0.00% | 1 | 63 |

Fixed Account

The fixed account earns interest at a declared rate. The fixed account interest rate will never be less than the guaranteed minimum interest rate.

| Fixed Account | Illustrated Rate | From | Through |
|----------------------|-------------------------|-------------|----------------|
| | 5.25% | 1 | 63 |

Lookback Guarantee

Your policy contains a Lookback Guarantee which may provide an increase in policy value, if the average annual percentage rate of any actual index credits, over the respective Lookback Guarantee Period, is less than the average annual percentage rate of any index credits based on the Lookback Guarantee rate, as defined in the policy, per year cumulatively over resetting 8-year periods. The first 8-year period begins at the time your policy is issued and will be recalculated, over an 8-year period, after the previous period has elapsed.

Policy Value & Net Surrender Value

The policy value consists of your net premiums, minus monthly deductions and withdrawals, plus any interest.

The Net Surrender Value is the amount available to you upon surrender and the amount available for loans and withdrawals. The Net Surrender Value is the policy value minus any surrender charges, loans and loan interest. Surrender charges are applicable for 9 years from issue.

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Loans and Withdrawals

Loans are available immediately, as long as you have sufficient Net Surrender Value. There are 2 types of loans available: standard loans and participating loans.

| Loan Type | Policy Value | Loan Interest Credited | Loan Interest Charged |
|---------------|---|---|-----------------------|
| Standard | Value is transferred to a loan account. | Fixed interest rate | Fixed loan rate |
| Participating | Value that serves as participating for the loan remains in the index account(s) and/or the fixed account. | Credited based on the performance of the index account(s) and/or fixed account. | Fixed loan rate |

Only one type of loan is allowed at a given time. You can switch between loan types once per year on the policy anniversary.

Participating loans are made available to you. All such loans will remain in the Index Strategies that you have chosen and will be charged at a fixed interest rate determined by Symetra.

The illustrated values reflect loans. All loans are assumed to be taken on the monthly anniversary day. Any loan repayments are shown as negative amounts in the loan column.

This illustration reflects the selection of a participating loan. Illustrated values reflect loan interest accumulating.

Standard Loan Current Loan Interest Charge Rate: 4.25%

Standard Loan Guaranteed Loan Interest Charge Rate: 4.25%

Participating Loan Current Loan Interest Charge Rate: 5.50%

Participating Loan Guaranteed Loan Interest Charge Rate: 5.50%

Policy Changes

This illustration is not a request for a policy change. The changes illustrated will not be automatically processed and will need to be requested in writing at the time you would like the transaction processed. We recommend you request an in-force illustration in conjunction with your policy change.

| Policy Year | Description | New Amount |
|-------------|------------------------------|------------|
| 6 | Change premium amount | \$10,000 |
| 9 | Decrease death benefit | \$896,462 |
| 17 | Request loans or withdrawals | \$83,328 |

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Guideline Premium Test

Initial Guideline Single

Premium: \$470,826

Initial Guideline Annual

Premium: \$32,733

Under a policy that qualifies as life insurance, gain is not taxable as long as it remains in the policy, and the death benefit is excludable from gross income. To qualify as life insurance for federal income tax purposes, the policy must satisfy one of two alternative tests under IRC section 7702. This illustration applies the Guideline Premium Test, which requires generally that the sum of the premiums paid under the policy, less certain withdrawals, at any time must not exceed the greater of the guideline single premium or the sum of the guideline annual premiums at such time and that the death benefit at any time is not less than the applicable percentage of the policy value at that time. Guidelines are calculated at issue, but must be recalculated upon a change in your underwriting risk classification or a change to the coverage of the policy. Failure to qualify as life insurance will result in adverse tax consequences.

MEC Status

Initial Annual Seven Pay

Premium: \$86,000

A loan or withdrawal from a life insurance policy generally is excluded from gross income to the extent it does not exceed the investment in the policy. However, if a life insurance policy also is a Modified Endowment Contract (MEC), a loan or withdrawal is includible in income to the extent of any gain on the policy, and an additional tax may apply. The gain is the excess of the policy value over the premiums paid reduced by any prior untaxed distributions and it is determined by aggregating the policy with all other MECs issued to the same policyowner in the same calendar year by affiliated life insurance companies. In general, a life insurance policy will be a MEC if the accumulated premiums paid under the policy at any time during a 7-year testing period exceeds the sum of the annual Seven Pay premiums as of that time, as determined in accordance with the requirements of IRC section 7702A.

Whether your policy will be a MEC depends on the timing and amount of premiums paid. The payment of premiums may be affected by your policy's features, your exercise of any policy options, and any changes you make to the policy. Whether the illustrated policy will become a MEC depends on the facts and circumstances. If your policy is at risk of becoming a MEC by some action you are about to take, we will notify you and give you an opportunity to avoid MEC treatment by reconsidering such action.

Based on our understanding of current tax laws, a policy issued and maintained consistent with this illustration would not become a MEC.

For tax implications, see your tax or legal professional.

This illustration is not intended as investment, accounting, legal or tax advice and Symetra Life Insurance Company does not give investment, accounting, legal or tax advice. This illustration does not attempt to provide more than general U.S. tax information associated with life insurance policies. This information is written in connection with the promotion or marketing of life insurance issued by Symetra Life Insurance Company.

You should seek advice based on your particular circumstances from an independent tax professional.

This is not a complete description of the Symetra Life Insurance Product. For a more complete description, please ask your insurance producer.

| Policy expiration based on premium outlay | | | Policy Year: Age: | 16 72 | Policy Year: Age: | 20 76 | Policy Year: Age: | 64 120 |

*Policy values are calculated based on your premium allocation and illustrated rates. Please refer to the Policy Details.

A zero in the annual premium outlay column means that no premiums were paid in that year; it does not mean that the policy is paid up. Charges will continue to be deducted from the policy value. Depending on actual results, premiums may need to be increased or resumed.

I certify that this illustration has been presented to the Applicant or Owner and that I have explained that any non-guaranteed elements illustrated are subject to change. I have not made any statements that are inconsistent with the illustration.

I have received a copy of this illustration and understand that any non-guaranteed elements illustrated are subject to change and could be higher or lower. The Insurance Professional has told me that they are not guaranteed.

*Policy values are calculated based on your premium allocation and illustrated rates. Please refer to the Policy Details.

A zero in the annual premium outlay column means that no premiums were paid in that year; it does not mean that the policy is paid up. Charges will continue to be deducted from the policy value. Depending on actual results, premiums may need to be increased or resumed.

Loans and withdrawals may be taken only when adequate net surrender value is available. This illustration shows loans and withdrawals that can be supported by the illustrated non-guaranteed net surrender value. However, beginning in year 17, these loans and withdrawals cannot be supported by the guaranteed net surrender value.

The effective policy loan annual percentage interest rate is determined at time of loan, but will never exceed:

Standard Loan Option Annual Interest Rate: 4.25%

Participating Loan Option Annual Interest Rate: 5.50%

Interest is charged in advance and is due from Owners on each Policy Anniversary for the next Policy Year. If the Owner does not pay such interest when due, the amount of the interest is added to the outstanding Loan Amount. Thus, unpaid interest is charged interest during the subsequent Policy Year.

*Policy values are calculated based on your premium allocation and illustrated rates. Please refer to the Policy Details.

Net Outlay is the annual premium minus any loans or withdrawals in that year, plus any loan repayments or loan interest paid in cash in that year.

WLX Test

Age & Risk Class: Male, Age 57, Standard Plus Non-Nicotine

Initial Annual Premium: \$86,000

Initial Death Benefit: \$917,010

Loan and Withdrawal Detail Report

Initial Annual Premium Payment: \$86,000.00

Initial Interest Rate *Varying Rate

Premiums Payable Through Age 64

Current Policy Charges

A zero in the annual premium outlay column means that no premium payments were paid in that year; it does not mean that the policy is paid up. Charges will continue to be deducted from the policy value. Depending on actual results, premium payments may need to be increased or resumed.

This is a supplemental life insurance illustration. Please refer to the basic life insurance illustration for guaranteed elements and other important information. Non-guaranteed elements are not guaranteed and are subject to change. Actual results may be more or less favorable.
